

CleanEnviro Summit Singapore (5th Edition)

Climate change, depletion of natural resources and rapid urbanisation are fueling the demand for cleaner and more sustainable solutions. Besides initiating public and private partnerships to serve the international markets, Singapore plays a pivotal role as a talent hub for CleanTech test beds and solutions.

Organised by Singapore's National Environment Agency since 2012, the biennial CleanEnviro Summit Singapore (CESG) serves as a global networking platform for thought leaders, senior government officials, regulators and policy makers, and industry captains.

The fifth edition of the event is built on the theme, '**Towards Sustainable and Climate-Resilient Cities**', and will deep-dive into five key areas: Waste as Resource, Enhanced Hygiene Standards, Effective Pest Management, Sustainable Energy and Pollution Control.

CONFERENCE HIGHLIGHTS

Clean Environment Leaders Summit

By Invitation Only

A dedicated high-level platform designed to provide opportunities for **environment leaders** to network and forge new partnerships to advance sustainability. The plenaries will examine policies, innovations, ideas and international collaborations from a strategic standpoint, to address the environmental needs and challenges of growing cities.

Clean Environment Convention

The technical segment of CESG, where **industry professionals** and **technical experts** have the opportunity to exchange ideas and connect over the latest solutions and best practices for environmental needs and challenges. The sessions will cover themes that encompass the essential technical domains that will equip environmental stewards with practical tools and insights for their respective areas of work.

Youth Environment Leaders Immersion Programme

The inaugural Youth Environment Leaders Immersion Programme is a new platform for **youth leaders** in the environmental landscape. The Forum will allow them to explore the expo, network and exchange ideas and expertise with their peers, as well as with established leaders in the environmental sphere, tapping into exciting opportunities for growth and innovation.
