PRESS RELEASE

POWERING WASTE TO WEALTH WITH AN INNOVATIVE INCINERATION TECHNOLOGY — VERTICAL COMBUSTOR™

Plantec Argonaut Pte Ltd (Singapore) started their business in August 2017 as a wholly owned subsidiary of Plantec Inc. (Osaka, Japan) after they had successfully delivered a first-of-its-kind toxic industrial waste Vertical Combustor Incineration Plant in Tuas, Singapore. The plant was unveiled by Mr. Masagos Zulkifli, Minister for the Environment and Water Resources who had recognized the Vertical Combustor as an innovative waste management solution.

Established as a Singapore-based international business development, Plantec Argonaut aim to promote Vertical Combustor — a new type of incineration technology invented in Japan — across Asia-Pacific region. As the issue of cost effective and sustainable waste management system has become one of the biggest global challenges in recent years, Plantec Argonaut strongly believe that Vertical Combustor is the solution: The new incineration technology has made treating different types of waste such as biohazardous waste and toxic industrial waste efficiently without using auxiliary fuel possible. It will benefit the waste management companies as well as municipalities who are facing performance issues with the conventional types of incinerator.

At CleanEnviro Summit Singapore (CESS) 2018, Plantec Argonaut will be showcasing Vertical Combustor's key features and technical advantages; how this innovative incineration technology can be integrated to create a Waste-to-Energy Incineration Plant, which will contribute and improve the quality of our living environment.

We look forward to sharing with you the uniqueness of Vertical Combustor Incineration Plant at CESS 2018 from 9th to 11th July. Look for us at Booth D-18, Level1.

NOTES TO EDITORS

COMPANY PROFILE:

■ **PLANTEC ARGONAUT PTE. LTD.** (formerly known as Argonaut S.E.A. Pte. Ltd.)

Established: 1 August 2017

Managing Director: Motoaki Katsui

Address: 3791 Jalan Bukit Merah, #04-04 E-Centre @ Redhill, Singapore 159471

Telephone: +65 6222 1114

Email: info@plantecargonaut.com

Activities: Engineering, Procurement & Construction of Waste Incineration Plants

Plantec Argonaut Pte. Ltd. is a wholly owned subsidiary of Plantec Inc., Japan. Our team of skilled engineers have been working diligently in developing innovative waste treatment technologies over the years, with the objective to formulate Vertical Combustor™ Incineration Plant to its finest performance in order to meet the clients' needs and satisfaction. Our mission is to make a better living environment on a global scale.

■ **PLANTEC INC.** (Parent company in Japan)

Founded in 1967, Plantec Inc. have engaged in research and development of waste and flue gas treatment systems for more than 50 years with 253 project references. In 1994, Plantec delivered the first Vertical Combustor with "SLA (Super Low Air ratio) Combustion Method" which made the cost effective waste combustion possible. Its unflinching performance in treating different types of waste, including the highly contagious medical waste in the past 24 years (and counting) has been a proven record of efficacy in powering waste to energy. ISO 9001:2008 certified.
