Asia Climate Forum brings extreme weather & climate change agenda to CleanEnviro Summit Singapore for 2020

1 Media Generation Ventures Ltd (MGV) of the UK is delighted to announce that Asia Climate Forum will form part of CleanEnviro Summit Singapore (CleanEnviro SG) 2020, organised by the Singapore National Environment Agency (NEA), and be co-located at the Sands Expo & Convention Centre, Marina Bay Sands, Singapore from 5 to 9 July 2020.

2 CleanEnviro SG is a global networking platform for thought leaders, senior government officials and policy makers, regulators and industry captains. Held alongside Singapore International Water Week and World Cities Singapore, the 5th edition of CleanEnviro SG is themed 'Shaping Environmental Sustainability in Growing Cities'.

3 The Asia Climate Forum Exhibition & Conference is the dedicated climate change & environmental services event for Asia, Africa and the Pacific Islands. The event aims to promote public-private-academic sector engagement in the use of hydrometeorology and related tools to build resilience to the impacts of extreme weather & climate change.

4 Tony Stephenson, Event Director of Asia Climate Forum, said: "We are delighted to be part of CleanEnviro SG for 2020. By joining forces with CleanEnviro SG as a strategic co-located event, our aim is to complement the excellent CleanEnviro SG programme with a highly focused climate change & environmental agenda to promote the importance of public, private and academic co-operation in mitigating the potentially catastrophic impacts of extreme weather, especially flood, climate change, and poor air quality for society, business, critical infrastructure, and essential services."

Dalson Chung, Managing Director of CleanEnviro SG said: "It is with great pleasure that we welcome Asia Climate Forum to the CleanEnviro SG programme of events. Its focus on weather and climate and on the need to bring together the public, private and academic sectors to develop solutions to mitigate the impact of extreme weather & climate change can only help build stronger partnerships among all our stakeholders and complements our aim of addressing mounting environmental challenges."

6 Asia Climate Forum comprises three complementary but distinct events:

- InterMET Asia: Using weather data to address the impact of extreme weather & climate change events; the routine use of weather data to increase the efficiency of public and private enterprise.
- InterFLOOD Asia: Building resilience and adaptability to weather related flood & water events.
- InterAIR Asia: Monitoring and mitigating the consequences of air quality & pollution.

7 InterMET Asia was launched in Singapore in 2014 and has taken place annually since then, while InterFLOOD and InterAIR are recent additions.

Notes for Editors

About CleanEnviro SG 2020

CleanEnviro SG is the biennial global networking platform for industry and government leaders to identify, develop and share practical replicable and scalable solutions to the environmental challenges facing our cities as a result of rapid urbanisation.

It is organised by NEA and will be held from 5 to 9 July 2020 in conjunction with Singapore International Water Week and the World Cities Summit.

CleanEnviro SG 2020 will feature international expert speakers and networking opportunities with government officials, industry captains, investors and prospective partners. In 2018 more than 24,000 attended the overall event.

How Asia Climate Forum will complement CleanEnviro SG 2020

1. The Conference Programme

The conference programme will comprise a 2-day core programme with 3 parallel tracks, InterMET, InterAIR and InterFLOOD, with presentations, workshops and panel sessions (7-8 July).

Asia Climate Forum will complement CleanEnviro SG in four ways:

InterMET Asia

The conference & exhibition will enable delegates to learn about innovations in the acquisition and application of hydrometeorological data and related information to (a) improve economic and business efficiency on a routine basis, and (b) to mitigate, manage and provide early warning

of the impacts of extreme weather & climate change on public and private enterprises, and critical urban infrastructure and essential services.

Conference topics to include:

- Routine applications of weather data to enhance efficiency (e.g. transport, communications, energy, agriculture).
- Weather data acquisition and applications in the urban environment.
- Increasing the resilience of critical urban infrastructure.
- Impact of extreme weather & climate change on public health.
- Extreme weather warning systems.
- New markets - autonomous vehicles, building environmental control systems.
- Private sector business briefings on innovations in weather data acquisition technology, data processing and applications development, and in forecasting and warning.

InterFLOOD Asia

The conference & exhibition will enable delegates to learn about the innovations in thinking, funding, technology and design of critical infrastructure, systems and processes to manage, mitigate, and build resilience and adaptability to weather & climate change-related flood events, especially those impacting the urban environment and its critical infrastructure.

Conference topics to include:

- Flood mapping and forecasting.
- Building resilience and adaptability to weather & climate change related flood events.
- Coastal and critical infrastructure protection.
- Flood related public health risks.
- Private sector business briefings on innovations in flood forecasting, mitigation and management.

InterAIR Asia

The conference & exhibition will enable delegates to understand the health related and other impacts of air pollution and to learn of the latest developments in air quality & pollution monitoring technologies and alerting systems.

Conference topics to include:

- Mitigating & managing air quality-related health risks.
- Pollution impact on solar power generation.
- Advances in air quality monitoring technology.
- Private sector business briefings on innovations in pollution measurement, monitoring and alerting.

Joint Workshop Programme

A series of joint workshops will highlight business opportunities, including:

- Data acquisition & processing; end user applications development.
- Opportunities for SMEs and business start ups.
- Weather and environmental risk insurance.
- Investment impact (fund portfolio selection & risk management).
- Disaster warning, response & recovery.

2. The Exhibition

The Asia Climate Forum Exhibition will comprise three zones - Weather & Climate Change; Flood & Water Management; and Air Quality & Pollution.

InterMET - Weather & Climate Change Zone: Focus on the latest innovations in hydrometeorology technology for acquiring, processing and communicating meteorological and hydrological data, and with associated forecasting and warning services.

InterFLOOD - Flood & Water Management Zone: Spotlight on innovative and smart solutions to flood control & water management, and in building resilience and adaptability to weather and climate change-related flood events.

InterAIR - Air Quality & Pollution Zone: Showcase the latest developments in air quality monitoring and measurement technologies.

The ACF Exhibition will include a dedicated area for companies to give business presentations spotlighting their key enabling technologies and solutions to extreme weather, flooding and air pollution.

About Media Generation Ventures Ltd.

Media Generation Ventures Ltd. is part of Media Generation Group Ltd. which was founded in 2001 and is an experienced exhibition and conference organiser based in Harrogate, UK.

About National Environment Agency

Formed on 1 July 2002, the National Environment Agency (NEA) is the leading public organisation responsible for ensuring a clean and green environment, and the sustainable development of Singapore. Its key roles are to protect Singapore's resources from pollution, maintain a high level of public health and provide timely meteorological information. NEA also develops and spearheads environmental initiatives and programmes through its partnership with the People, Public and Private sectors. It is committed to motivating every individual to care for the environment as a

way of life, in order to sustain a quality living environment for present and future generations.
