

N tanglement:

Advanced Pest Control Solution

Experience the power of N Tanglement, an innovative engineered formulation designed to revolutionize pest control. With its unique physical mode of action, N tanglement offers unparalleled effectiveness in controlling pest population in hard to access location.

Cutting-Edge Technology:

N tanglement harnesses the forefront of scientific innovation with an intricately interconnected matrix, forming a dynamic framework. It swiftly engulfs and immobilizes targeted pests upon contact, revolutionizing traditional insecticide. Embrace this cutting-edge solution for unparalleled efficiency in pest management and delve into the realm of scientific progress.

Safe and Residual Free:

As N tanglement prioritizes safety for both humans and environment. Our product leaves no toxic residues on the surface after treatment, making it ideal for use in residential, commercial, food processing plants, and public spaces. Providing alternative solution towards harmful chemicals and embrace a clean and eco-friendly pest control Solution.

- ❖ Non Toxic
- ❖ Knock down within Seconds
- ❖ Non Residual Effect
- ❖ Insecticide Free
- ❖ Cleaning Agent

Application

N tanglement

(with water only)

- Product's degradation and its byproducts are harmless to humans and environment.
- Non-toxic formula
- No toxic residues on the surface after treatment
- Mitigates insect resistance.
- Rapid and uniform spreading, induce paralysis on targeted insect
- Safe for use around food.
- No required downtime after treatment

N tanglement (adjuvant)

(with insecticide working solution)

- Synergistic action as an adjuvant when mixed with insecticide.
- Rapid and homogenous distribution of insecticide on treated surfaces.
- Improves penetration of insecticides into hard-to-reach areas.
- Providing working solution additional mechanism of action through physical means

Dilution Rate

N tanglement

(with water only)

(Low Infestation)

5ml of N tanglement to 1L of Water
(High Infestation)

10ml of N tanglement to 1L of Water

N tanglement (adjuvant)

(with insecticide working solution)

1ml of N tanglement to 1L of
Insecticide working solution.

(Insects Controlled)

Ants, Beetles, Cockroaches,
Crickets, Earwigs, Flies, Fleas, Gnat,
Midge, Mosquitoes, Moths, Spiders,
and Stored Product Pests.
