Highlights from CESG Catalyst 2021

Themed “**Enhancing Sustainable Development in a Pandemic World**”, the CleanEnviro Summit Singapore (CESG) Catalyst 2021 took place on 29 September 2021 at Sands Expo and Convention Centre, Singapore, in partnership with Temasek’s Ecosperity Week.

Senior Minister of State for Sustainability and the Environment, Dr Amy Khor, delivered her welcome speech to more than 200 participants, including leaders and policy makers from business, government and international institutions. Panellists discussed *A Strategic Blueprint for Climate-resilient Cities*, and looked into success factors for *Building Resilience Against Public Health Threats* in the plenary sessions. Our panellists included Her Excellency Jo Tyndall, New Zealand High Commissioner to Singapore; Ms Dechen Tsering, United Nations Environment Programme (Asia and the Pacific); and Professor Teo Yik Ying, Dean Saw Swee Hock School of Public Health, National University of Singapore.

The success of CESG Catalyst 2021 is made possible by the strong support of our participants, sponsors, partners, and speakers, so here is a **BIG THANK YOU** to all who joined the conference!

“Collaboration and long-term planning will be key. Dealing with climate change requires transformation on an economy wide scale. Mainstreaming and normalising climate change into policies, whether at government or industry level, is important.”

Her Excellency Jo Tyndall, New Zealand High Commissioner to Singapore

“The idea of ‘clean’ and ‘cleaning’ will not evolve that much. What would change is the implementation of the protocols. From a policy angle, all ten countries in Southeast Asia have the right policies around the aspiration towards ‘clean’ and ‘cleaning’, but what is difficult is actually ground implementation. It is all down to whether the protocols are sufficiently and adequately rolled out.”

**Professor Teo Yik Ying, Dean Saw Swee Hock
School of Public Health, National University of
Singapore**
