Action for a Sustainable
and Clean Environment

According to the United Nations (UN), July 2023 was the hottest month ever on record. The UN Chief has called for "dramatic, immediate climate action" to limit global temperature rise. Countries around the world are taking action and implementing measures to decarbonise.

Achieving our ambition of net zero emissions requires collective and sustained effort from all sectors. CleanEnviro Summit Singapore (CESG) 2024 will explore net zero solutions under the theme, 'Action for a Sustainable and Clean Environment', through its pillars: *Climate Action*, *Resource Circularity* and *Public Hygiene*.

Learn more about the *Climate Action* pillar in [July's e-newsletter](#).

Pillar 2: Resource Circularity

This month's e-newsletter highlights the second pillar. Find out how businesses can build a sustainable closed-loop system in the *Resource Circularity* pillar, to reduce resource reliance, minimise environmental impact, and promote long-term economic growth. The pillar also covers *management of waste as a resource* and *circular economy solutions*.

**Management of waste
as a resource and circular
economy solution**

Minimise waste and conserve resources through:

- Reduction of material use
- Redesign towards being less resource intensive
- Recapturing of materials where waste is a resource

Exhibitor Profiles for Resource Circularity

Exhibit at CESG if your business specialises in these fields:

- Extended Producer Responsibility Scheme systems
- Digital and automation solutions for resource efficiency
- Material and resource recovery systems
- Waste collection, sorting, recycling and treatment systems or services
- Waste-to-energy and energy recovery systems

Become an Exhibitor

The last pillar, *Public Hygiene*, will be covered in the next e-newsletter.

Get involved as a Sponsor

- Profile your company's thought leadership
- Enhance the visibility of your company in the environmental field
- Demonstrate your company's commitment to sustainability

Exhibit at CESG 2024

CESG 2024 will feature cutting-edge and frontier technologies, as well as the latest innovations from the environmental services. Some of these include:

- Autonomous robotics
- Smart sensors
- Resource recovery systems
- Decarbonisation systems
- Augmented reality in the areas of sustainability and climate resilience
