Join us at the CleanEnviro Summit Singapore (CESG) 2024, held at the Sands Expo & Convention Centre from 19 to 21 June 2024! The sixth edition of CESG focuses on '**Action for a Sustainable and Clean Environment**', where we will explore solutions for enabling net zero cities. Participants can also expect in-depth discussions and the sharing of best practices through high-level plenaries and business forums, under three core pillars:

1. Climate Action
2. Resource Circularity
3. Public Hygiene

Pillar 1: Climate Action

Climate change disrupts economies and affects communities. How can businesses actively do their part to mitigate climate change? The **Climate Action** pillar will address four key topics: *Clean Energy, Climate Defence, Decarbonisation, and Pollution Management*.

Clean Energy

- Reducing greenhouse gas emissions while mitigating environmental impact
- Decreasing reliance on finite resources via a resilient energy system

Climate Defence

- Developing policies and strategies to address climate risks
- Ensuring businesses and the community adhere to environmental laws and standards, and collectively fight against climate change

Decarbonisation

- Transitioning to low-carbon alternatives
- Adopting innovative business practices, such as carbon capture and storage, circular economies, and carbon pricing

Pollution Management

- Limiting the disposal of hazardous and solid waste into our environment
- Implementing multi-prong pollution control, monitoring and prevention measures

Exhibitor Profiles for Climate Action

We invite businesses who specialise in the *Clean Energy, Climate Defence, Decarbonisation, and Pollution Management* fields, to showcase products and services under the **Climate Action** pillar.

Join us as an exhibitor if your business falls within these industry profiles:

- Carbon capture, storage and usage systems
- Climate monitoring, modelling and mitigation systems
- Sustainable energy and energy efficiency systems
- Sustainability services, such as green financing, consultancy and knowledge partners
- Air quality control and pollution management

Stay tuned for information on the Resource Circularity and Public Hygiene pillars.

Opportunities for Businesses

If you are a business in the environmental or sustainability sector and are interested in exploring opportunities in the region, contact us for more information on CESG 2024 and the Environment Expo.

Get involved as a Sponsor

- Profile your company's thought leadership
- Enhance the visibility of your company in the environmental field
- Demonstrate your company's commitment to sustainability

Exhibit at CESG 2024

CESG 2024 will feature cutting-edge and frontier technologies, as well as the latest innovations from the environmental services. Some of these include:

- Autonomous robotics
- Smart sensors
- Resource recovery systems
- Carbon capture and storage
- Augmented reality in the areas of sustainability and climate resilience
