Expand Your Network at CESS 2018

The CleanEnviro Summit Singapore (CESS) 2018 is looking forward to welcoming delegates from all over the world, such as Asia Pacific, China, Europe, and the United States.

Connect with international luminaries, speakers and delegates as you engage with participating companies to forge business partnerships.

If you have not registered, seize this opportunity to be a part of this international business platform! Sign up as a CESS delegate to co-create environmental solutions and engage in discussions with international expert speakers.

Scan QR code or click [here](#) to register

Attendees may also access Business Connect, a platform that facilitates the discovery of new solutions, and the exploration of prospective partnerships with industry captains, technology experts, innovators and investors.

CESS 2018 Featured Sponsors

Be sure to engage with these CESS 2018 Sponsors at the [Environment @ City Solutions Singapore](#) exhibition! Read on to find out more about how their capabilities align with your business needs:

Since 1961, CNIM and MARTIN have cooperated in the Energy-from-Waste sector, successfully using the proprietary best available technologies and know-how of both companies, in addition to the proven track record of CNIM as EPC general contractor and as operator.

This combined expertise is utilised to design and build very large and high-performing plants around the world, similar to the [IWMF project](#), being planned in Singapore.

CNIM and MARTIN have recently formed CNIM MARTIN Pvt Ltd, jointly owned and operated. This company based in Chennai/IN will deliver turnkey solutions and services for biomass and energy-from-waste plants in South and South-East Asia.

Diversey's purpose is to protect and care for people every day. Diversey has been, and always will be, a pioneer and facilitator for life. Diversey constantly delivers revolutionary cleaning and hygiene technologies across all of their global sectors, including: cleaning products, systems and services that efficiently integrate chemicals, machines and sustainability programs. Everything Diversey does is based on the belief that cleaning and hygiene are life essentials. With over 94 years of expertise, Diversey safeguards their customers' businesses, contributing to productivity improvements, lower total operating costs and brand protection.

Kärcher is the world's leading manufacturer of cleaning technology ever since the company was founded in 1935. With high pressure cleaners and ultra-high pressure cleaners, vacuum and steam cleaners, pumps for the home and garden, sweepers and scrubber-driers, car washes, cleaning products, dry ice shot-blast machines, drinking and waste water treatment plants, water dispensers and electronic data transmission based fleet management, Kärcher offers innovative solutions to problems. They include coordinated products and accessories together with advice and service. Whatever the task, Kärcher has the perfect cleaning solution!

LHT Holdings Limited is a publicly listed company that has been in the timber industry for more than 40 years. Established in 1977, LHT has grown to be a leader in the industry with an annual turnover of more than S\$40,000,000 and 168 employees.

LHT installed the first German-made waste wood recycling facility in year 1999, which converts waste wood into "new wood". The objective was to mitigate their huge capacity of waste wood from wood pallets production and convert it into "New Wood", to be used for their manufacturing of ISPM15 compliant IPPC Pallets. With this cutting-edge technology, LHT helps customers ship their products overseas with ease.

Rat infestation in urban landscape has grown to be a difficult challenge, to monitor, let alone to solve. This is where RodentEye comes in. A real-time rodent surveillance system that is developed by Pestech. A forerunner of this technology application, was developed in collaboration with Singapore's Agency for Science, Technology and Research (A*STAR) and the National Environment Agency (NEA). With its concept rooted in IoT, the RodentEye sensor network allows active surveillance on rats in and around buildings, plus data analytics, for users to find hot spots, entry points and rodent pathways for better rodent management strategy. It is the perfect tool for pest control and building/facility management.

To address the inefficiencies of waste collection procedure, Maxiton Engineering Asia (MEA) and V3 Smart Technologies has jointly launched a smart Dual Compactor for automated compaction and on-demand collection. A product created by experts in engineering services, the custom-built compactor incorporates IoT sensors to provide data visibility.

MEA is a subsidiary of New Lead Engineering, one of the market leaders in material handling equipment, while V3 empowers user with contextual intelligence through data analysis and equip users with tools for automated job dispatch. The access to real-time information on a dispatch system improves service responsiveness which is integral to waste collection.

Veolia is the global leader in optimised resource management, providing innovative waste, water and energy management solutions

In Singapore, Veolia works across the whole spectrum of environmental services including integrated waste and recycling management of hazardous and non-hazardous waste, industrial services, public cleansing and water management.

Through their comprehensive expertise, they are able to develop tailored services for governments, businesses and industries. Veolia's one stop customised solutions improve operational, financial and environmental performance, making Veolia a reliable partner in their clients' sustainable growth

Services Veolia provides:

- Integrated Waste and Recycling Management
- Hazardous Waste Management
- Public Cleansing Services
- Industrial Services
- Industrial Water Treatment

CESS 2018 Facebook LIVE Panel Discussion

On 22 May 2018, **Mr Masagos Zulkifli**, Singapore's Minister for the Environment and Water Resources, hosted his first Facebook LIVE session in the lead-up to CESS 2018. Themed **Optimising Smart Technologies for Novel Environmental Solutions**, the panel discussion centred on environmental issues, and comprised experts from government, industry and academia.

Visit the CESS Facebook page to check out soundbites from the discussion!
